Account Status Policy:

Customers cannot convert their accounts into affiliate accounts. To become an affiliate, customers must create a separate, new account.

Active Affiliate or Customer Definition:

An affiliate or customer is considered active if they have a minimum trading wallet balance of 35 USDT generating interest. If no interest accrues, the affiliate is classified as inactive.

Generation Compression:

If a team has inactive affiliates or customers, the system skips over them and counts the next active position. For qualification purposes, only the first five active generations are considered.

Affiliate Referral Bonus:

The affiliate referral bonus is paid on the monthly ROI of affiliates in your downline.
